- **Reduce** operating, labor and transaction costs through automation and bulk messaging.
- **Expedite** time to market.
- **Easy to use** by any user in the organization.
- **Increase** service reliability, security and compliance.
- **Improve** payments and business process management.

Are you already using SWIFT or considering SWIFT as a more cost-effective, secure and reliable way to exchange financial messages associated with payments, securities and other transactions internationally?

BankServ's TurboSwift Service Bureau provides financial institutions and corporations an easy and quick-to-implement way to connect with SWIFT, while eliminating costly upfront and ongoing costs. And, as a member of the TurboSwift Service Bureau, companies can choose from a variety of options for further improving payments and business process management.

A Fully Hosted and Managed SWIFT Service Bureau Solution

BankServ's TurboSwift Service Bureau is a fully hosted and managed approach that provides all the software, hardware and support services you'll need to connect with SWIFT. This eliminates the need for multiple systems and processes or a costly in-house SWIFT connection that still requires development, ongoing maintenance and dedicated resources for disaster recovery.

Our experienced project management and implementation staff can set-up your connection in a matter of weeks. Thereafter, dedicated support staff will continue to maintain the system 24/7, providing you with call center support, making any necessary upgrades and handling disaster recovery whenever needed.

Secure, Reliable, Easy-to-Use SWIFT Connectivity

At the heart of the service bureau is BankServ's TurboSwift™, a SWIFT-certified interface, hosted through the service bureau. It connects your company directly with SWIFTNet and comes with tools that enable anyone at your company site(s) to easily view, distribute, receive and manage messages. SWIFT-based standards, such as SWIFTNet Phase 2, are constantly tracked and built into TurboSwift to maintain the highest security and reliability levels. TurboSwift also supports all MT message types for FIN as well as other SWIFT services.

Additional Options for Improved Operations

As members of BankServ's TurboSwift Service Bureau, clients can also choose from the following additional services:

- **TurboFileAct Services** for bulk message transfers and lower transaction costs.
- **Payment Mapping** that enables automation, integration and payment consolidation by translating any message format, including SWIFT MT and EDI, into any other format as required by virtually any front or back-office system.
- **Global Compliance Watch List & Screening Solution**, an integrated solution that filters messages through all required Watch Lists, including OFAC, BIS, and many more.
- **Multi-Office and Remote Access** that offers multiple company branches or offices access via a centralized server without having to set-up individual SWIFT licenses.

About BankServ - Worldwide Experts

BankServ, worldwide experts in electronic payments and messaging solutions, was founded in 1996 and now serves over 400 financial institutions and corporations in 52 countries. It was recently recognized as one of the fastest growing companies in North America, and handles funds movements for more than a million consumers and thousands of financial institutions and corporations.
